

AIR IONIZATION

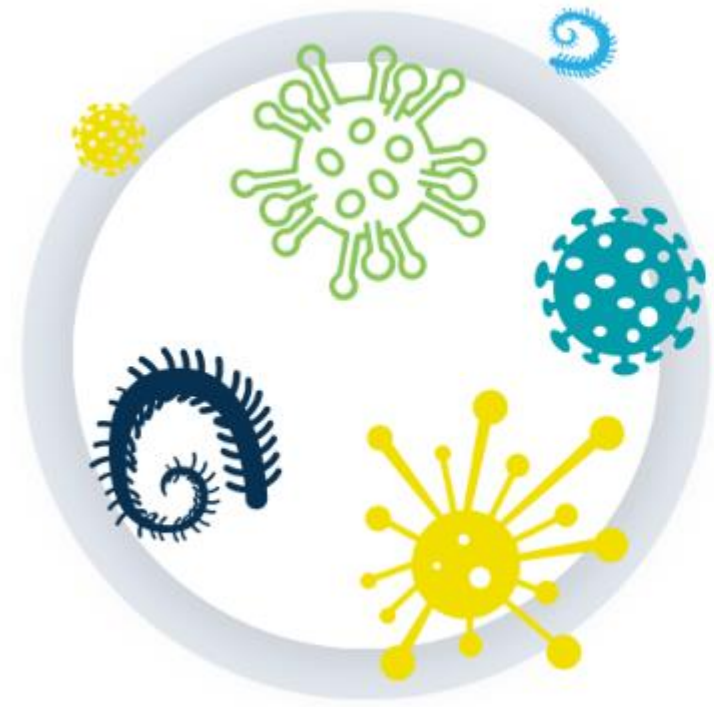

AIR DEGERMIFICATION

WASTE AIR PURIFICATION

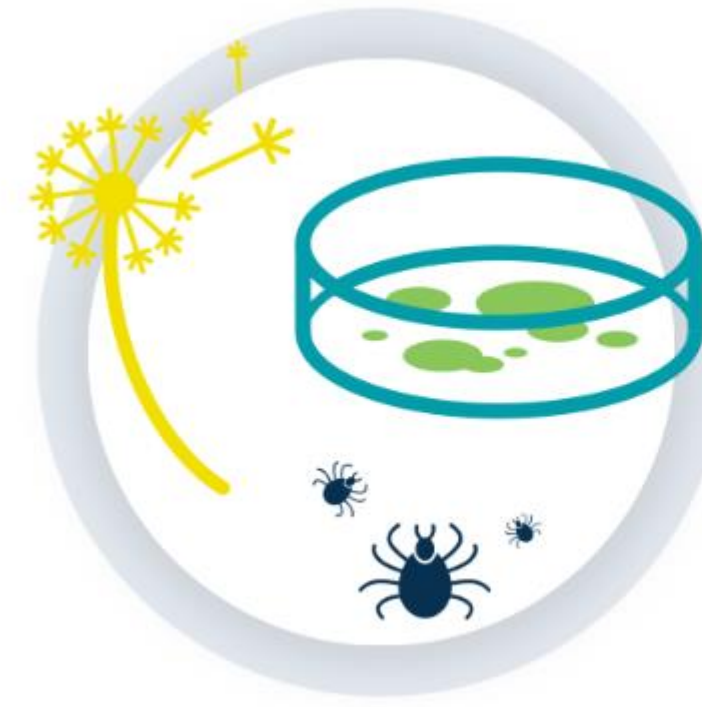

GERMS

Multiresistant germs and specific viruses are becoming more dangerous – most germs are mainly spread through airborne droplets.

ODORS

It's the one thing people notice first. The presence of putrid smells and odors can be quite disgusting.

ALLERGENS

Approximately 20% of all people are battling with allergies every day.

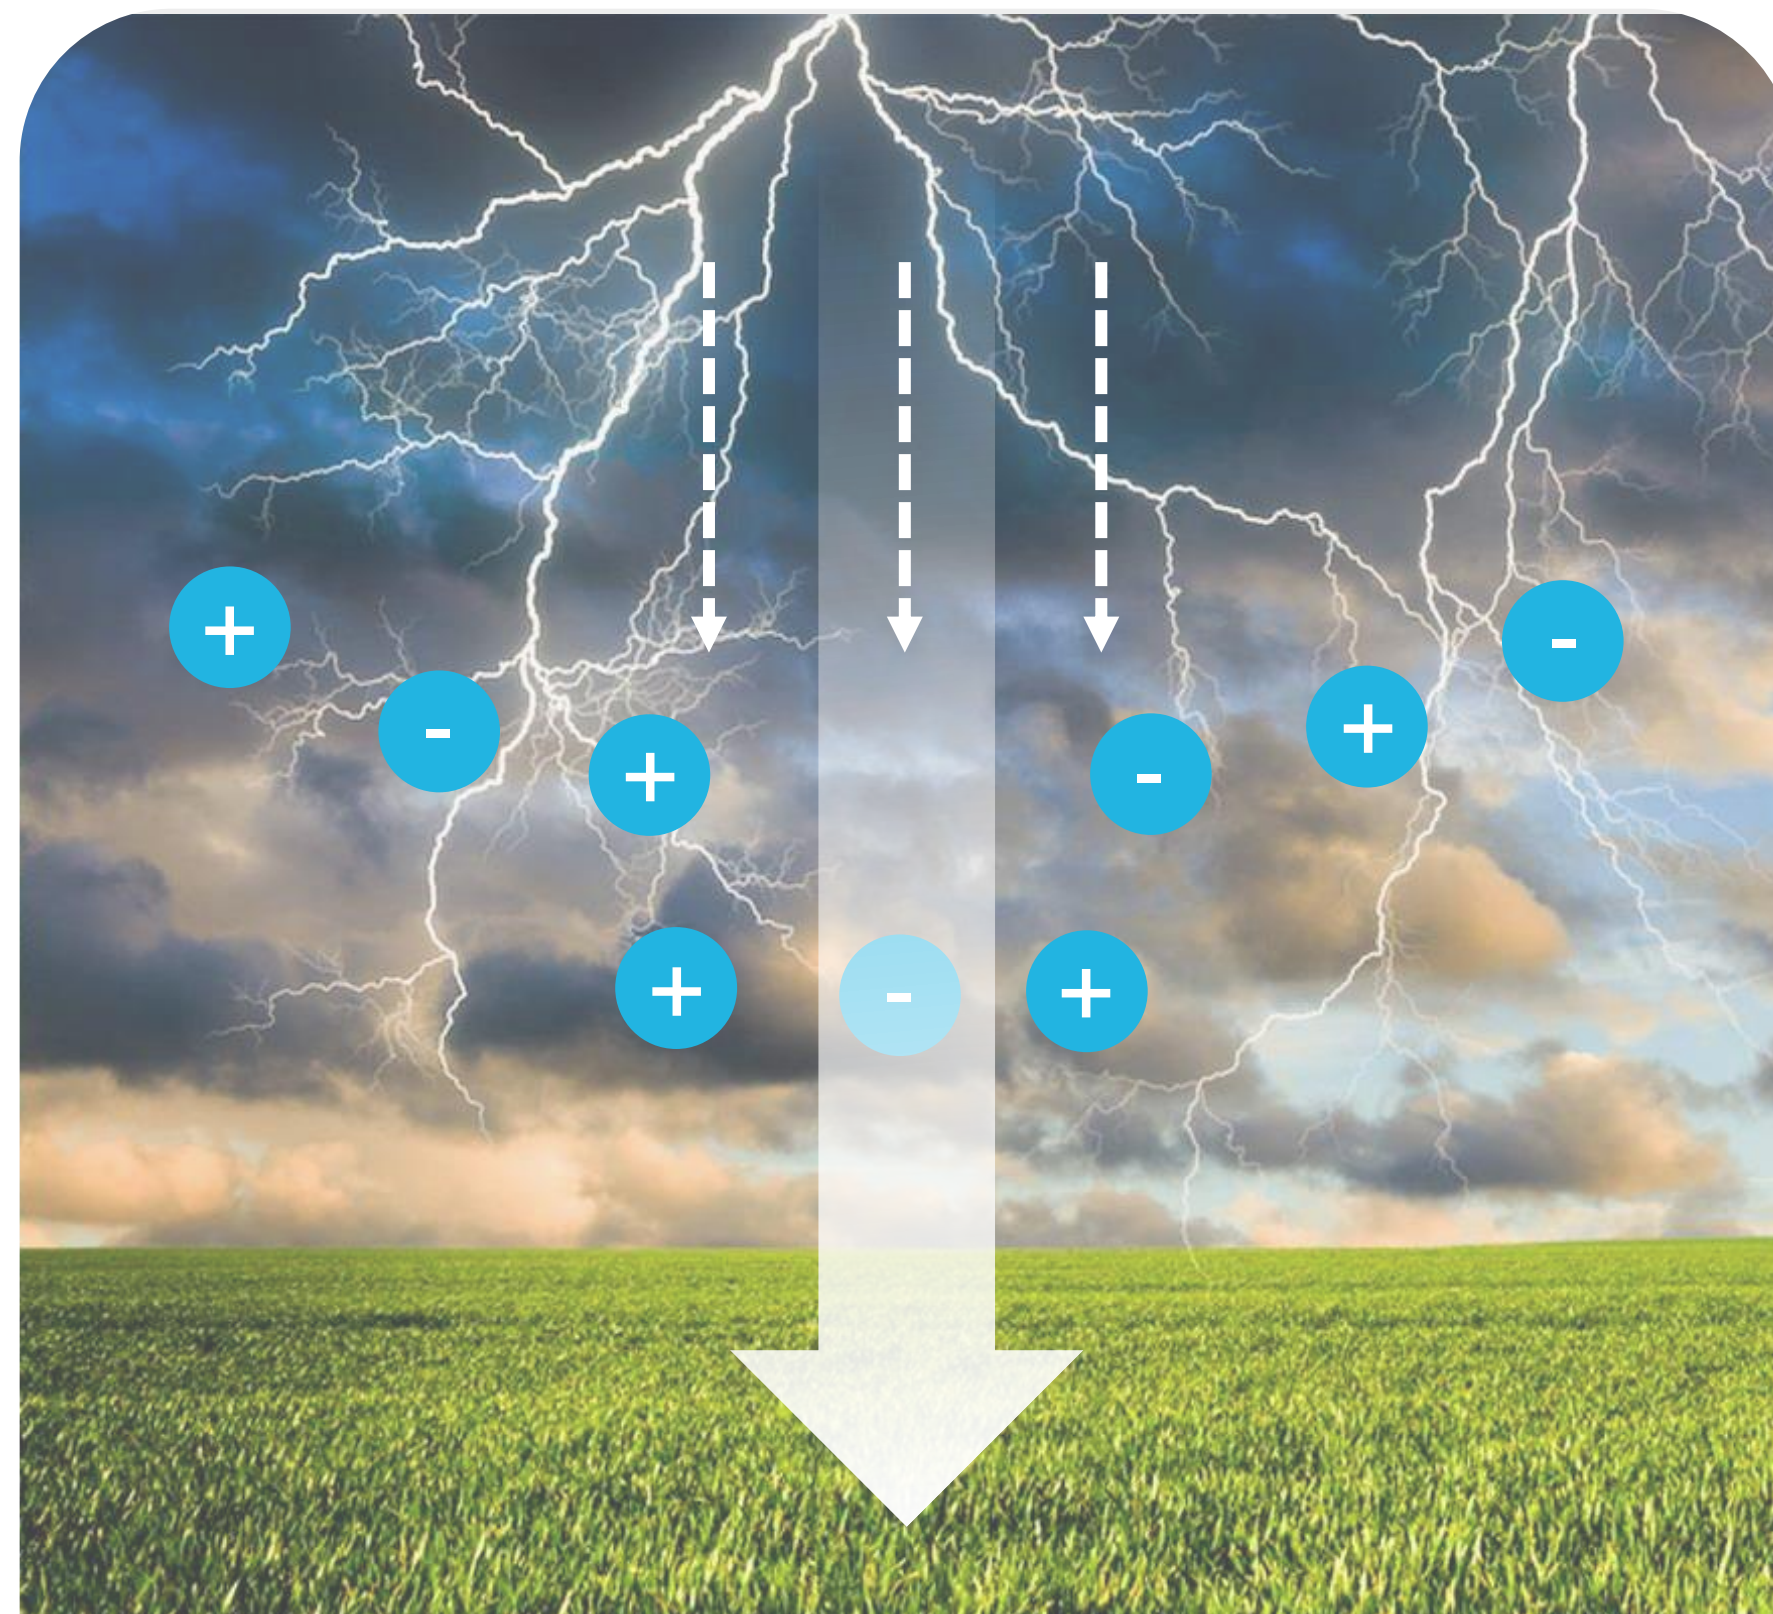

OTHER IRRITANTS

Volatile Compounds (VOCs) are harmful chemicals emitted from every day products..

CLEAN AIR

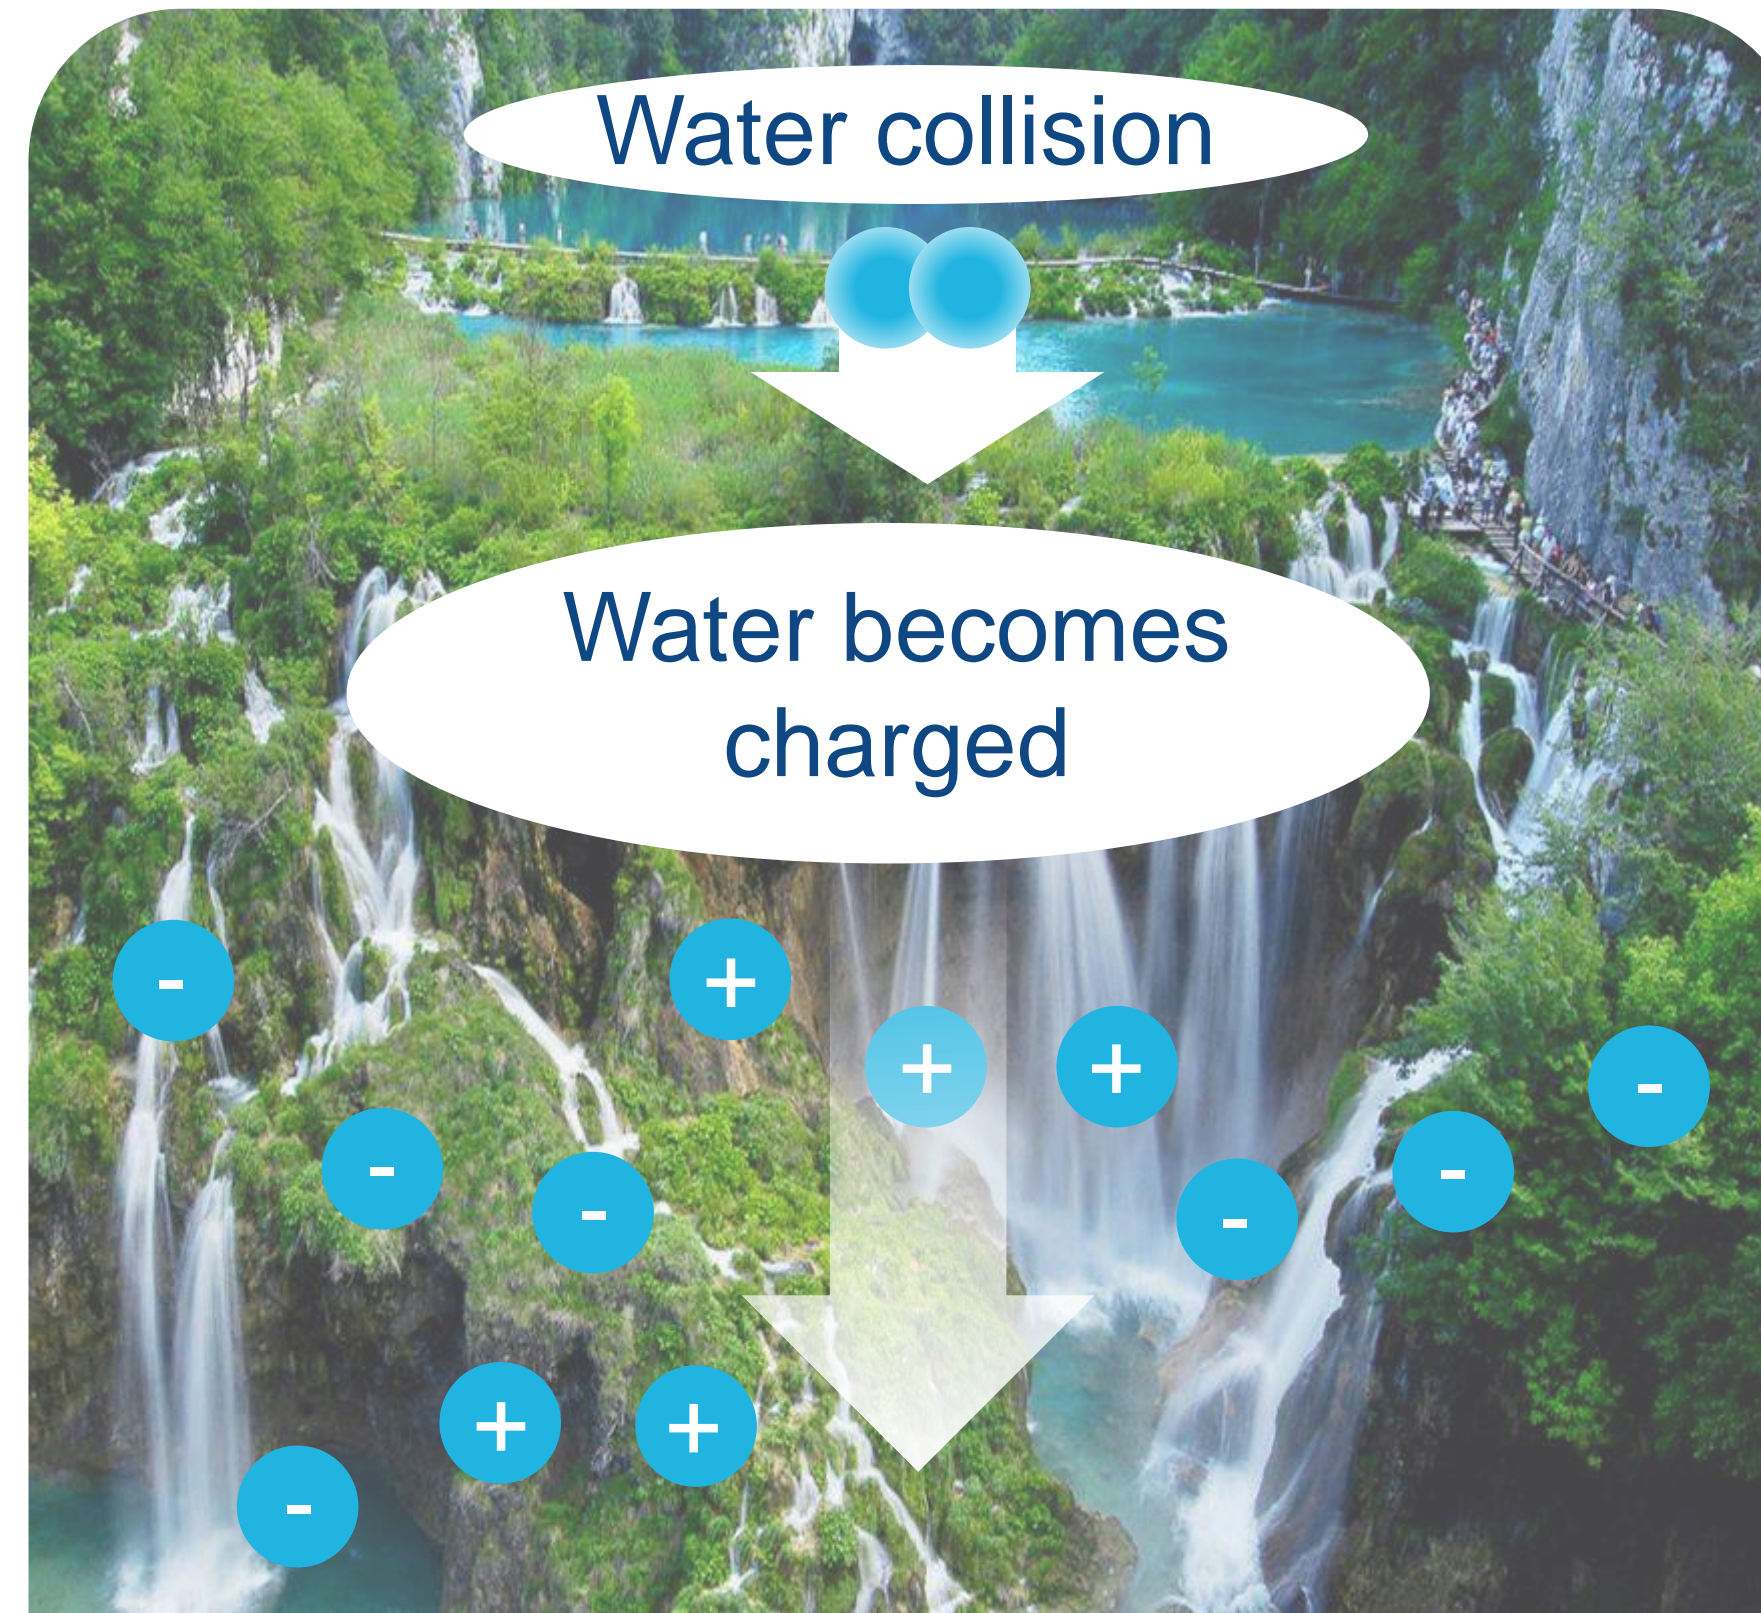

Nature shows us
how.

THUNDERSTORMS

A large amount of ions are generated by an electrical discharge phenomenon

WATERFALLS

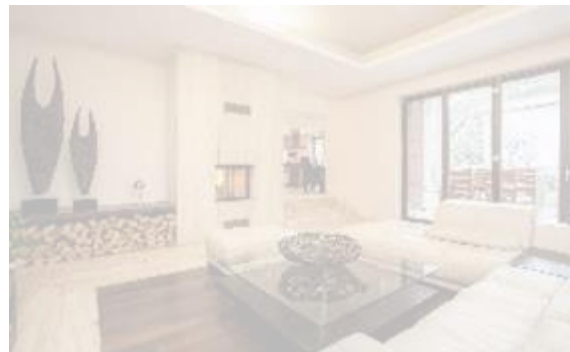

Surrounding air becomes charged

Ions around us and **THEIR FEEL GOOD FACTOR**

The proportion of Ions is highest around moving water (storms, oceans, rivers, waterfalls) – that also explains why we feel so energized and refreshed at the ocean. The worst are found in windowless rooms and closed, moving vehicles. Higher concentrations of ions are essential for a positive mood, let us work more efficiently and feel more revitalized. Concentrations below 100 Ions/cm³ can already lead to headaches, deficiencies in concentration and fatigue, leading to the Sick Building Syndrome.

**Virucide Report: Air Deco Pyramide Equipment,
Bipolar Ionization Technology by Bioclimatic GmbH, Germany.**

5. Results:

Table 1 – Coronavirus (strain MHV-3), different contact times to the “Air Deco Pyramide Equipment”

Product	Time	Different positions of the plates in the Biosafety cabin	Coronavirus (strain MHV-3) Table 3*	Negative Control
Air Deco Pyramide	10 minutes	L1	*99,999% (virucide)	Negative (no virus)
	20 minutes	L2, L5	99,999% (virucide)	Negative (no virus)
	30 minutes	L3, L4	99,999% (virucide)	Negative (no virus)

PRODUCTS

AEROTRON

For air conditioning and ventilation systems, airports, food industry, hotels and restaurants, commercial kitchens, offices and administrations, clinics and medical practices, nursing homes, animal breeding and husbandry, private area etc.

The background image shows a large, industrial-grade cooling unit, the AEROMAT, suspended from a metal ceiling in a greenhouse. The unit is a large, rectangular, grey metal box with a textured surface. Yellow pipes run along the ceiling and down the side of the unit. The greenhouse is filled with various plants, including tall green stalks and clusters of white flowers. The lighting is bright, coming from large windows on the right side of the frame.

AEROMAT

Stand alone unit for cooling rooms, food industry, trash rooms, warehouses, commercial kitchens, clinics and medical practices etc.

AEROTEC

German Pavilion – Expo Center Hannover

Stand alone units for food industry, cooling rooms, commercial kitchens, small warehouses, offices and administrations, clinics and medical practices, nursing homes, animal breeding etc.

Stand-alone Unit **AEROTEC**

The units of the aerotec series are to be mounted alternatively to the ceiling or the wall permanently and are designed with stainless steel housing for continuous operation. The control of the units is either done by the integrated intensity controller on the surface of the unit or separately by means of a remote controller.

Professional Stand-alone Unit in odor heavy rooms

Versatile use with maintenance-friendly stainless steel housing

Optimal stand-alone device with use for various applications

Available with and without fan, integrated and external control possible

Precise optimization of room air hygiene

Low operating and maintenance costs

Air Cleaner Q

Air purification with a minimum of space – principle of operation for a new grid ceiling device (60 x 60 cm)

For offices, meeting rooms, sales areas, sanitary facilities, etc.

ABOUT *BIOCLIMATIC*

- Headquartered in Germany
- 40 years of experience & competence
- Worldwide distribution
- Various patents & Expert in the field

OPERATIONAL DEPARTMENTS

Management and Administration

Research and Development

Marketing

Sales in Germany and Global Sales Support

Production, Order Processing and Project Management
