

## About 2G Energy Inc.

2G Energy is a leading firm in the combined heat & power (CHP) technology industry. With more than 8,000 CHP systems installed in over 55 countries, 2G is laying the groundwork for a green energy transition. Over 50% of 2G's CHP systems run on carbon-neutral sources and allow for a seamless conversion from natural gas to renewable energy usage. Since the early 2010's, 2G pioneered the development of the world's first commercial CHP system to run entirely on hydrogen energy.

## Products and Services

2G strives to empower businesses' decarbonization strategies and offers CHP solutions tailored to each customer's specifications and energy requirements. Their CHP product line ranges from 60kW to 2,500 kW and are compatible with multiple fuel options, including natural gas, propane, biogas and hydrogen. As a full-service provider, 2G's team of expert technicians offers services ranging from installation and containerization to maintenance and repairs.

## Key Advantages of 2G Energy's CHP Systems

- Low-carbon and cost-effective energy efficiency
- Option for fuel blending (natural gas, biogas, hydrogen)
- Streamlined conversion to carbon-neutral energy source post-installation
- Integrated system installation and maintenance services
- Containerization solutions

## Partnership Opportunities

2G aims to foster areas of cooperation with project developers and engineering firms specialized in the decentralized energy business. 2G also looks forward to working on EPC projects related to the healthcare, hospitality, wastewater, biogas and energy industries.
