India: Kochi

What we do

Portfolio overview

intech

Smart Industry

Digitalization for industrial systems and plants

Automotive

Development, Validation, Software Development and Consulting

Railway Technology

Systems, Software and Safety Engineering
Modernization as ETCS retrofits
Digitalization

Selected in-tech locations with railway technology competencies

intech

Garching near Munich

Headquarters with more than 600 workplaces

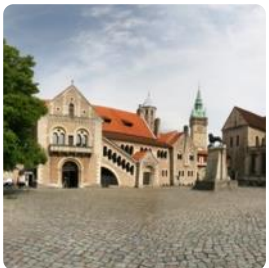

Berlin

Innovation Centre at DB co.lab on the EUREF Campus

Erlangen

Metropolitan region of Nuremberg in direct neighbourhood to Siemens Campus

Brunswick

Location close to the railway industry

Vienna

25 workplaces in the heart of Vienna

Barcelona

Engineering center for Spanish and international customers

Flexible in use

Secure IT connection

Prototype secure

Railway Technology at a glance

Division Engineering & Development Rail

intech

We combine in-depth knowledge of **rail vehicle technology** with strong expertise in **systems, software and safety engineering** and offer flexible solutions and partnerships in the **functional development** and modernization of rail vehicles.

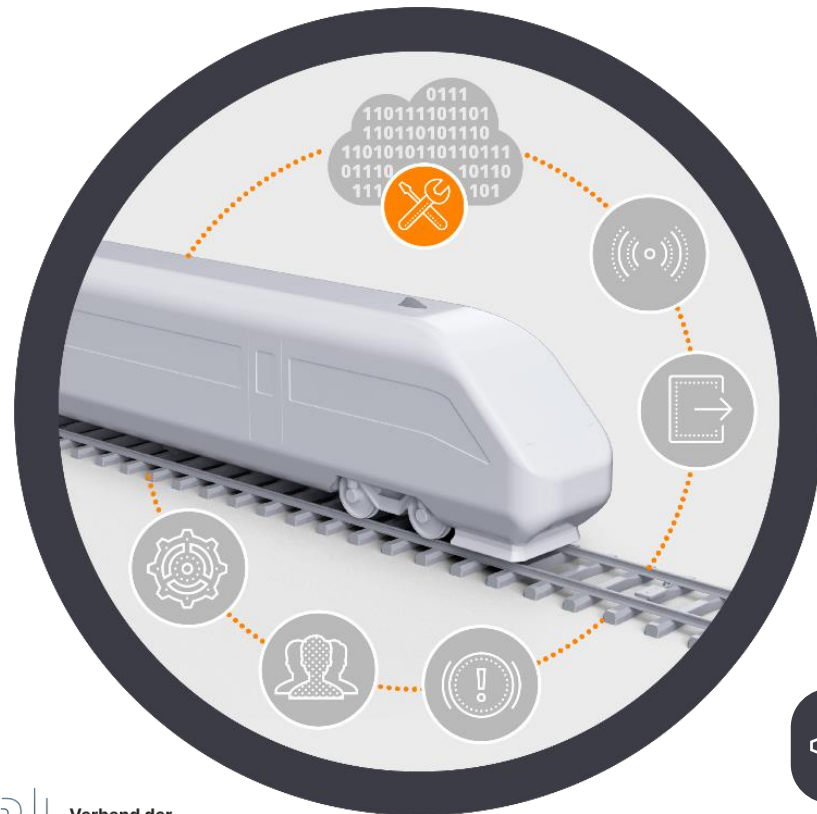

Customers

- Railway undertakings and operators
- Railway manufacturers
- Subsystem suppliers

Services

- Function development for rail vehicles and signalling technology
- Methodological consultancy on systems engineering
- Modernization and digitalization

Member of:

Systems Engineering

- Requirements management
- Concepts & Architecture
- Integration & Test
- Safety Engineering
- Safety Critical Software
- Electrical Engineering

Digitalization

- Software development
- UX / UI
- Cloud & IoT
- Mobile Solutions
- Communication & Backend
- Digitalization consulting

Processes & Methods

- Validation
- Homologation
- Safety Management
- Product Security
- Model-based Systems Engineering
