

About UCanPower

UCanPower was founded in Braunschweig, Germany in 2022. We are a dynamic company led by a highly qualified and experienced team of engineers. We are a passionate team committed to developing hybrid inverters and battery storage systems that promote a smarter and more efficient use of renewable energies. Our aim is to make the use of renewable energies more convenient.

Products and Services

With our wide range of products, we offer solutions catered to our customers' unique demands. During development and production, we strive to create user-friendly, high-quality products with intelligent functions. We firmly believe that by providing state-of-the-art hybrid inverters and energy storage systems we can make a positive impact on the environment while empowering our customers' energy decisions.

UCanPower takes pride in operating in a growing sector that is shaping the future of energy supply. Our products are designed for durability and efficiency, contributing to the transition towards renewable energy. At UCanPower, we are determined to offer our customers top-notch products and first-class customer service.

Key Advantages

- Leading technology, quick and easy installation, high reliability
- Reduction of grid-supplied power and savings on electricity costs
- Pre-sales and after-sales technical support (e.g., product training, on-site support))

Partnership Opportunities

UCanPower is seeking to make contact with installers, industry associations, solar panel providers and potential third-party sellers.
