Web Application Software Engineer (f/m/d)

Location: Trivandrum   **Candidates required: 5**

You will be part of an ambitious and highly motivated team which is building and delivering a comfortable web portal for our customers for managing details of the dSPACE products that they use. As a Web Application Software Engineer, you will mainly focus on building modern web applications with an outstanding user experience. You are an expert in delivering great usable web UIs but don't hesitate to work in surrounding areas (e.g. backend services).

Your Tasks

- You build reliable web applications within an experienced team

- You create a positive user experience that is highly optimized towards productivity

- You write clean, maintainable, and well tested code and participate in code reviews

- You participate in pair and mob programming sessions of your team

- You set up integration pipelines, support writing backend services and automate our business processes

- You contribute to our DevOps efforts to build, test, and release software faster and more reliable

Your Qualifications

- You have a university degree in Computer Science (or similar

- You are eager to learn and open-minded

- You have strong software engineering skills or want to build those

- You have passion for building web applications and writing great code for them

- You are familiar with agile software development

- You raise concerns over code quality or lacking test cases and fix problems once you see them

- You have excellent English communication skills, both written and verbal

What We Offer

- A crucial role in a young, dynamic, and fast-growing team

- A work environment that fosters trust, respect, and feedback

- An onboarding buddy to integrate you smoothly into our team

- Productivity and improvement time between the development sprints

- A mentor helping you with your personal goals, technical progress in general and your software engineering skills in particular

Our Tech Stack

- **Frontend**: TypeScript, React, Vite, Jest,

- **Backend**: C#, ASP.NET Core, REST, PostGres, Python, Docker/Container, Kubernetes, Microsoft Azure

About us

dSPACE https://www.dspace.com/en/pub/home.cfm is a market innovator and leader in providing solutions and systems for embedded controller software development in Automotive, Aerospace and Manufacturing industries.
