your entire life:

Identity matters!

“

*Every citizen needs to have an identity to
access government services and participate in
society and the economy.*

**We offer a variety of innovative
turnkey solutions for secure identification
documents**

Our Products

Passports

- **High-security electronic passports for Governments**
 - PC data page for laser engraving personalization
 - paper-based data page designed for inkjet personalization
 - eCover / Inlay chip application
- **End-to-end solutions:** conception, design and paper production to printing and booklet finishing, all within a secure and certified environment.
- **Security Features** – State of the art security features for all three verification levels, designed to meet customers needs.

Our Products

ID Cards

- **For travel:** at a border control or at any other control within the country. The travel application makes use of the same infrastructure as ICAO compliant ePassports.
- **eID application:** allows identification of cardholders and verification of their personal data in on-line and off-line scenarios by governmental agencies and commercial partners.
- **PKI application:** offers digital signing functionality as well as encryption and decryption functionality on standardized interfaces.

NATIONAL ID | RESIDENCE PERMIT |
DRIVER'S LICENCE | TACHOGRAPH | HEALTH CARD
