

ProfiSeal GmbH

Leading German seal manufacturer seeks Australian business partner –

Virtual meetings from 24th – 27th November 2020 available

Company Profile

ProfiSeal is specialized in the design and manufacture of highly reliable propeller shaft (sterntube) seals and bulkhead seals for the ship building Industry. Our seals are type approved from international classification societies including DNV GL, LR, BV, KR and have the product design assessment (PDA) from ABS. Hence, our products are fulfilling the highest demands and standards. Additional, project related drawing approvals like from US Coast Guard allow the implementation of our seals in almost every newbuild or refit project. Our products are used in workboats, offshore-supply vessels, passenger vessels, ferries (including RoRo, RoPax), cruise ships, fast patrol boats, governmental boats and special crafts as well as for yachts and super-yachts in more than 50 countries worldwide. One of our specialties is the customized adoption of our products to the needs of the client.
