- » Internal advanced training
- » New approaches by workshops on lifelike fractured cadaveric specimens with closed soft tissue

Location

1995

2000

2005

2014

- » Business founded in 1993
- » Headquarters and production on one site
- » 3 shift operation in production process
- » Worldwide Sales
- » Own R&D Department

Location

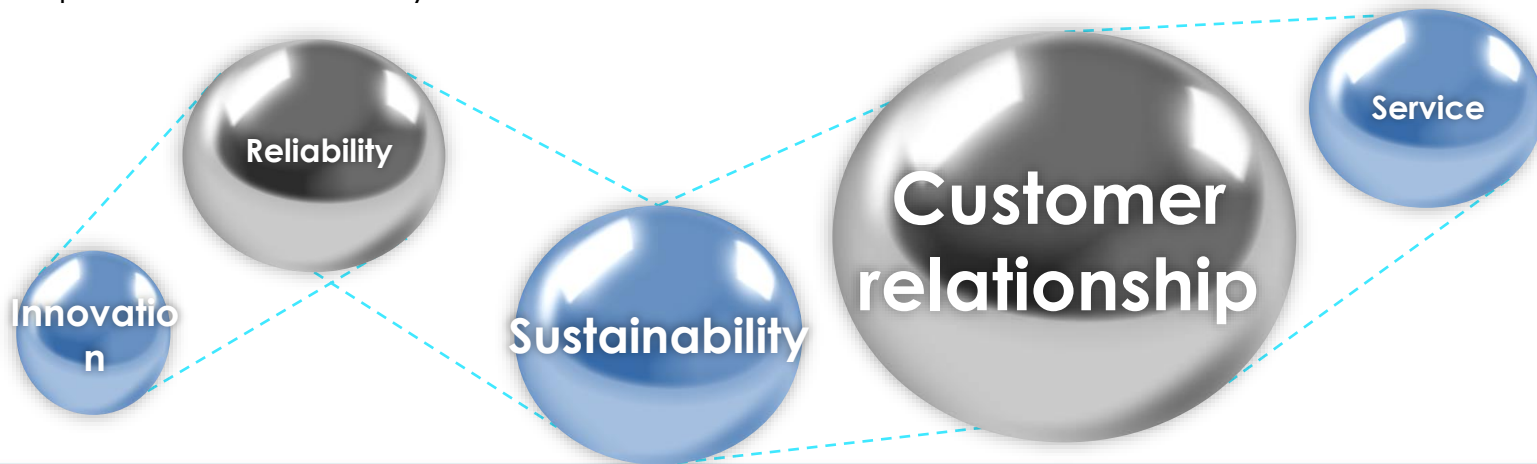

2019

- » New innovative Distribution Center
- » Great Opening last year
- » Former grocery store , no new building - to save resources
- » Storage for sterile products

Philosophy

Our company stands for outstanding **service** and best **quality**. We love our products and understand the needs of our customers up to 100 percent. Therefore in the **future** we also trust in **sustainability** and **innovation**. As a qualified and experienced team, we base the work with our business partners on reliability and fairness.

Corporate Responsibility

Environmental awareness and sustainability

- » We comply our ecological responsibility by consistently acting resource efficiently and environmentally friendly.
- » We only use modern, environmentally friendly technology in order to keep the environmentally polluting emissions, waste water and waste as low as possible.
- » Two photovoltaic systems produce energy to cover the needs at our company headquarters.
- » We save valuable raw materials by using heating energy of a heat exchanger.
