Why should you join?

Are you considering to build your industry/ warehouse or logistic center? Do you consider to start your industry in Poland but you are struggling to find in one place all necessary information specific to Poland like: **technical due diligence, construction permitting procedure, H&S regulation**? If you are looking for practical information about the above, this workshop is for you.

Maybe you are planning an **expansion** in your existing factory or warehouse, or **transferring** technology or products? Looking for guidelines based on top manufacturers **best practices** in project managements? During this workshop you will be presented live documents and methods used for smoothly and successfully run industrial projects: **budget, schedule templates and real examples**, H&S documents currently use at construction sites, managements plans based on many years of experience.

If you are planning to invest millions in projects, you should be sure that you have all information and right professionals in place.
