

Renewable Energy in Germany at a Glance

23 May 2016, Bangkok, Thailand

Jan-Benjamin Spitzley,

Consultant on behalf of the Energy Solutions – made in Germany Initiative by the German Federal Ministry for Economic Affairs and Energy

Organiser

www.export-erneuerbare.de

Agenda:

- The Energy Solutions made in Germany Initiative
- Transformation of the German Energy System
- Challenges and Opportunities through the use of RES
- The German Delegation

The Energy Solutions – made in Germany Initiative

Instruments offered by the initiative

✓ Foreign trade fairs

 ✓ Information and networking events

- ✓ Know-how transfer
- ✓ Information

✓ Trade missions

✓ Fact finding missions

Project Development& Flagship projects

Federal Ministry for Economic Affairs and Energy

The goals of the The Energy Solutions – made in Germany Initiative

Main objectives:

- to contribute to climate protection
- to stimulate the acceptance of renewable energy in other countries
- to showcase Germany's technical and business expertise in the field of renewable energy
- to provide comprehensive support to SMEs as they tap into foreign markets
- Platform for bilateral exchange

Federal Ministry for Economic Affairs and Energy

Transformation of the German Energy System

Five reasons for the Energiewende

- Development of new technologies as new sources of growth and employment
- Energy policy can be both sustainable and economically successful
- Reduce dependency on energy imports
- Reduce carbon emissions and reach climate protection targets
- Phase-out nuclear power generation

Federal Ministry for Economic Affairs and Energy

Two pillars of the Energiewende

Supporting fields of action

Federal Ministry for Economic Affairs and Energy

The energy transition follows a transparent, long-term strategy with specific targets.

		Achieved 2014	2020	2025	2030	2035	2040	2050
Climate	% greenhouse gas reduction (vs. 1990)	-27%	-40		-55		-70	-80 to -95
Renewable Energies	% gross electricity consumption	27.8%	35	40 to 45	50 5	55 to 60	65	80
	% final energy consumption	12,4%*	18		30		45	60
Energy Efficiency	% primary energy consumption (vs. 2008)	- 9 %	-20					-50
	final energy productivity	0.2%* p.a.		+2.1% p.a.				
	building renovation	~1%* p.a.		doubling of renovation rate: $1\% \rightarrow 2\%$				

Energy imports and domestic production in Germany

The Energiewende hits many birds with one stone as renewables and efficiency reduce Germany's energy dependence.

Share of renewables is growing in all sectors, but fastest in electricity.

Organiser

🧿 eclareon

Development of renewables-based electricity generation in Germany

* incl. solid and liquid biomass, biogas incl. biomethane, sewage gas and landfill gas as well as the biogenic fraction of waste, from 2013 incl. sewage sludge; BMWi based on Working Group on Renewable Energy-Statistics (AGEE-Stat); as at December 2015; all figures provisional

Federal Ministry for Economic Affairs and Energy

Challenges and Opportunities through the use of RES

The main share of payments for renewable electricity goes to existing plants. New installations account for a much smaller share.

and Energy

Public acceptance of the *Energiewende*

y	The increased development of renewable energy is "important" or "extremely important"	
n	Phasing out nuclear energy by 2022 is the right decision	
t	The energy transition - moving towards a predominant energy supply from renewable sources - is right	
11	The energy trasition is "important" or "very important"	
t	The aims and targets of the energy transition are right	
ר ר	ggregated index for acceptance of the energy transition (for businesses and the general public)	

92% 71% 56% 89% 82%

10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

Percentage of people that agree or strongly agree with the given statement

The energy transition enjoys a high degree of public approval.

0%

Federal Ministry for Economic Affairs and Energy

Conventional power plants need to adapt to higher flexibility needs.

Federal Ministry for Economic Affairs and Energy

Renewables will partially cover 100% of demand by as early as 2022.

Federal Ministry for Economic Affairs and Energy

Germany will maintain top security levels despite the energy transition.

The German economy is increasingly benefiting from both domestic and international renewables investments.

F fo

Gross job creation in the German renewables sector

The energy transition has positive effects on various levels of the economy.

Federal Ministry for Economic Affairs and Energy

Ownership structure of German RES facilities in 2012

Renewable installations create multiple opportunities for entrepreneurship – the ownership structure is versatile

Federal Ministry for Economic Affairs and Energy

Expansion of renewable energy sources in Germany

Source: 50 Hertz

Business opportunities: the number of renewable power plants has grown exponentially over the past 14 years.
