

About Optimo Solar & Energy

Optimo Solar & Energy is a consulting project management firm on all things solar and energy. They are no stranger to navigating worldwide markets and pride themselves on designing durable, high-performance energy optimization systems. Having already built a strong customer base in the MENA region, Optimo Solar & Energy brings in German engineering expertise to equip businesses with reliable decentralized solar systems.

Services

Optimo Solar & Energy has four technical specializations critical to promoting energy efficiency: building insulation, photovoltaic systems, solar thermal systems and factory energy efficiency measures. Optimo Solar & Energy sources expert engineers, quality materials and reliable installation services to evaluate, plan and execute the implementation of cost-saving energy efficiency systems for private, commercial and industrial buildings. As a one-stop shop, Optimo Solar & Energy streamlines the solar installation process by overseeing all project phases from the initial consultation to its final implementation.

Key Advantages of Optimo Solar & Energy Services

- One-stop shop for residential and industrial energy efficiency solutions
- Dual technical expertise in electric and thermal solar options
- Extensive portfolio of suppliers for solar installations

Partnership Opportunities

Optimo Solar & Energy is interested in connecting with construction firms, manufacturing businesses, homeowner associations and solar equipment suppliers to develop a comprehensive understanding of the US solar market. They are also excited to learn more from academics and researchers in the solar industry.
