

ELLIS SPRINGS

CLEAN & PROTECT

Our driving force – The new age of disinfection

Imagine a highly effective, 100% biodegradable, pH-neutral disinfectant you can use for your whole family and even for your pets, without damaging sensitive skin or polluting the environment. After 9 years of intensive research, this dream is now a reality.

- **No alcohol, which has been proven to dry skin.**
- **No synthetic preservatives, surfactants and other petrochemical components used in conventional disinfectants.**
- **Powerful cleaning and disinfection with a clear conscience and gentle on people, animals and the environment. Fully biodegradable.**
- **Unlike chemical disinfection, our solution always works, as it is based on a physical process!**

Our driving force is to offer you effective broad-spectrum disinfection for the whole family that does not harm the skin and is gentle on people and nature.

Our vision – Responsibility based on conviction

We believe in a harmonious world with healthy and happy people, families and animals.

In a thriving, diverse and vibrant natural world free of substances harmful to our health.

We have made use of our knowledge of nature to offer you effective total protection against persistent enveloped and non-enveloped viruses, bacteria, spores and fungi in a revolutionary process.

Biological disinfectants are the future of hygiene.

Help us to support people in their healthy and happy lifestyles.

Send a strong signal to your employees and customers with responsibility based on conviction.

ELLIS SPRINGS

Our USPs

- Eliminates 99.9% of all kinds of germs, such as bacteria, spores, fungi, viruses (e.g. coronavirus, MRSA, ebola, hepatitis B + C, H5N1, polio virus, norovirus, influenza etc.)
- Extremely gentle on the skin even with frequent use, due to its pH-neutral solution
- Virucidal, bactericidal, sporicidal, fungicidal, levurocidal
- The first pH-neutral biocide not to contain alcohol or petrochemical ingredients that are irritating to the skin and have a drying effect
- The first water-based disinfectant to have an exposure time of only **15 seconds**
- Always effective, as it has a physical rather than a chemical effect
- Extremely skin-friendly – carries the Dermatest® Institute's "EXCELLENT" quality seal
- Environmentally-friendly and fully biodegradable
- Broad spectrum of effectiveness; also effective against the **coronavirus**
- Non-flammable, non-corrosive, non-irritating, non-toxic -> No EU warning symbols required
- Fat-free, Surfactant-free, free of colourants
- Vegan & Halal

Our results

- Eliminates 99.9% of all kinds of germs, such as bacteria, spores, fungi, viruses (e.g. coronavirus, MRSA, ebola, hepatitis B + C, H5N1, polio virus, norovirus, influenza etc.)
- Fast, guaranteed efficacy and effective protection due to short exposure times
- The skin's barrier is protected and remains intact.
- Does not impair the effect of cosmetic products on the skin
- Fully biodegradable, decomposing into the natural components of water and salt
- Protects nature and the environment extremely well
- Non-toxic ingredients and mode of action
- Also suitable for animals
- Unpleasant odours are eliminated

Effective coronavirus protection

- The test product was examined for its virus-deactivating properties against the Modified Vaccinia Ankara (MVA), comparable to the coronavirus.
- The test was carried out in accordance with the European standard E DIN EN 14476:2013+A2:2019
- The disinfectant is able to deactivate enveloped and non-enveloped, persistent virus groups, including corona.
- Its effectiveness against coronavirus has therefore been confirmed according to current reports.
- As the virus can live on surfaces for up to 72 hours and is also transmitted through the air, we recommend regular preventative disinfection of hands and surfaces.

ELLIS SPRINGS

ELLIS SPRINGS CLEAN & PROTECT Hand Disinfectant

-  Alcohol-free
-  Petrochemical-free
-  Fat-free and oil-free
-  Surfactant-free
-  Suitable for spraying, wiping and atomising

ELLIS SPRINGS CLEAN & PROTECT Hand Disinfectant

Mode of action

- Destroys cell membranes (bacteria)
- Denatures proteins
- Deactivates the DNA of viruses and hence loss of the biological function of these molecules
- Comprehensive spectrum efficacy in all areas, from prophylaxis to acute use

How to use

ELLIS SPRINGS CLEAN & PROTECT is a broad-spectrum disinfectant for disinfection of hands, and is suitable for spraying, wiping and atomising.

The number of bacteria can double in just 20 minutes.

ELLIS SPRINGS CLEAN & PROTECT Hand Disinfectant eliminates 99.9% of bacteria, fungi, spores and special viruses in just **15 seconds**.

Apply 6-9 ml to the hands and rub in vigorously, paying particular attention to the gaps between fingers.

Exposure time

Minimal exposure time of just 15 seconds.

Use biocides carefully. Refer to the package insert and product information.

ELLIS SPRINGS CLEAN & PROTECT Hand Disinfectant

Storage life

- 18 months from filling if unopened.
- 3 months once open.

Storage

- Store in a cool, frost-free and dark place.
- Unopened containers can be stored for **18 months**.
- Use open containers within 3 months.

Disposal

- Simple, environmentally-friendly disposal.
- Completely drain empty bottles, rinse out and dispose of with recycled materials collection.
- Wipe up any spilled material with normal disposable cloths or appropriate equipment and dispose of down the drain.
- The product is fully biodegradable and has a limited period of activity so that there is no risk to the environment.

Our responsibility to the customer

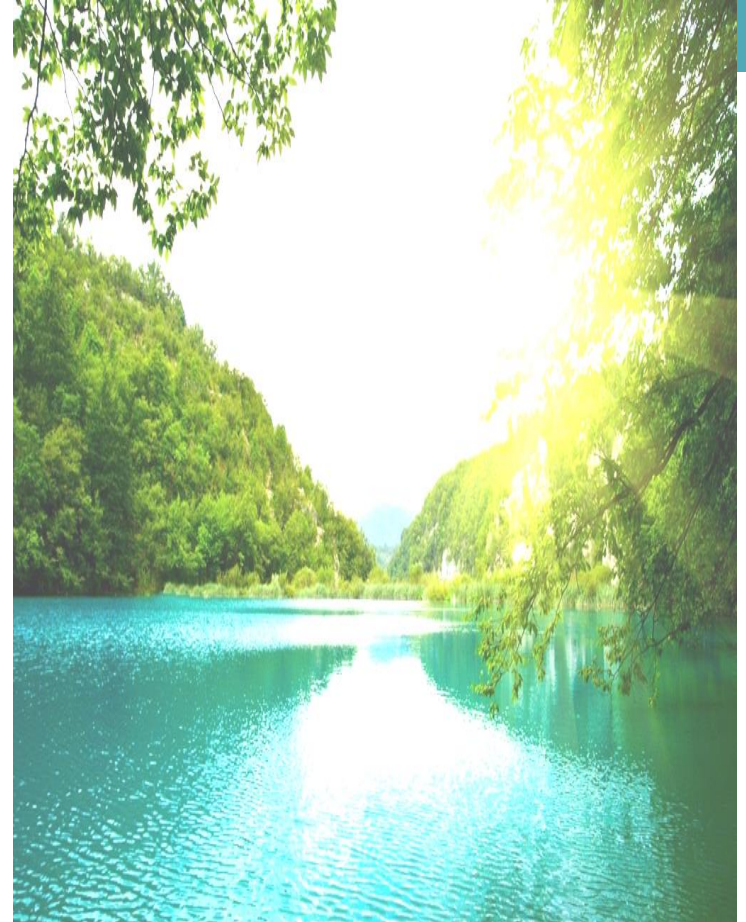

- Targeted and reliable disinfection of enveloped and even non-enveloped, persistent viruses, bacteria, spores and fungi on the hands
- Targeted and reliable disinfection of contaminated surfaces – enveloped and non-enveloped viruses, bacteria, spores and fungi
- Non-toxic ingredients and mode of action
- Does not irritate the skin – awarded a “EXCELLENT” quality mark by the Dermatest Institute
- Short exposure times and easy to use for the whole family

ELLIS SPRINGS

Our responsibility to the environment

- Biodegradable
- Non-toxic
- Non-flammable
- Sustainable
- Environmentally-friendly
- Petrochemical-free
- Recycled HDPE packaging and recycled boxes
- Environmentally-friendly and sustainable produced in Germany

Our quality promise to you

- Made in Germany
- 9-year long development time by a team of experts made up of virologists, biochemists and dermatologists
- Compliance with strict testing procedures and certifications
- Awarded the “EXCELLENT” quality mark for skin tolerability by the Dermatest Institute
- Biodegradable quality test mark
- Non-toxic – alcohol-free and petrochemical-free test mark

All of the above properties of ELLIS SPRINGS CLEAN & PROTECT Hand Disinfectant and Surface Disinfection have been confirmed and documented by European standards and their testing bodies.

Our Certified Test Reports

➤ **Examined / tested to EN1500**

Proof of efficacy against bacteria (E.coli) for hand disinfection

➤ **Examined / tested to EN1276**

Proof of efficacy against bacteria (E.coli, Pseudomonas, Enterococci etc.) for surface disinfection

➤ **Examined / tested to EN14476**

Proof of efficacy against viruses (enveloped viruses: Modified Vaccinia Ankara (MVA) / coronavirus, SARS; non-enveloped viruses: polio, adenovirus, Mureno, norovirus) for hand disinfection

➤ **Examined / tested to EN13727**

Proof of efficacy against multiple resistant germs (Staphylococcus Aureos) for surface disinfection

➤ **Examined / tested by Dermatest®**

Dermatological test / Proof of its harmlessness when applied to the skin.
Result: EXCELLENT

➤ **Registration: BAuA No.: on request**

BAuA Federal Institute for Occupational Safety and Health ECHA Art.95

➤ **EU Regulation on Chemicals, REACH Certificate**
