

Andrew Clennett

Chief Executive Officer
at Hiringa

Andrew is a co-founder and CEO of Hiringa Energy, a company actively developing green hydrogen infrastructure across New Zealand and Australia including one of the world's first nation-wide green hydrogen refuelling networks.

He has over 28 years in the energy sector having held a number of senior management and executive roles in major energy companies across the globe.

A native of Tasmania, Andrew holds a Honours Degree in Mechanical/Electrical Engineering and is a board member of the New Zealand Hydrogen Council.

In 2017 with a strong desire to apply his business skills to helping solve the challenges of climate change, Andrew co-founded Hiringa Energy. The company has grown from strength to strength, helping establish a key new industry focused on large scale decarbonisation of our energy, industrial and transport systems. Hiringa's growing portfolio of refuelling and Power-to-X projects have attracted global interest and enjoy strong support from partners, investors and governments.
