Quality, Service & Consultancy

VAG valves and gates are well known for functionality, quality, durability and long lifetime, even under the toughest operating conditions.

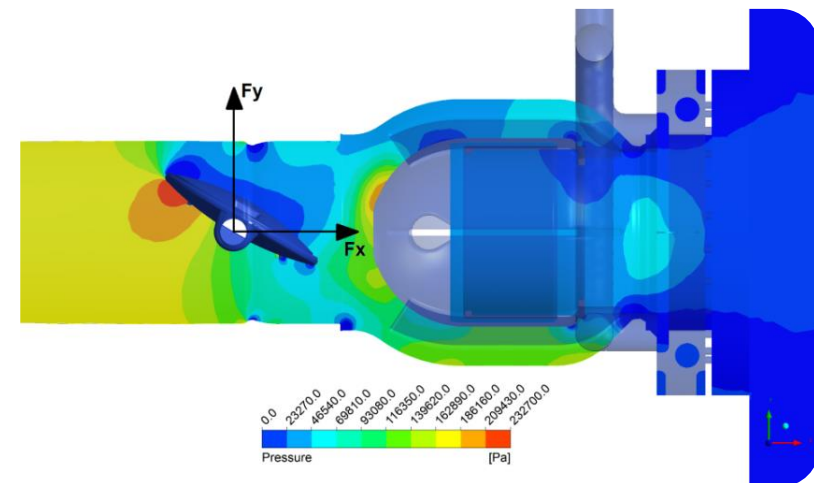

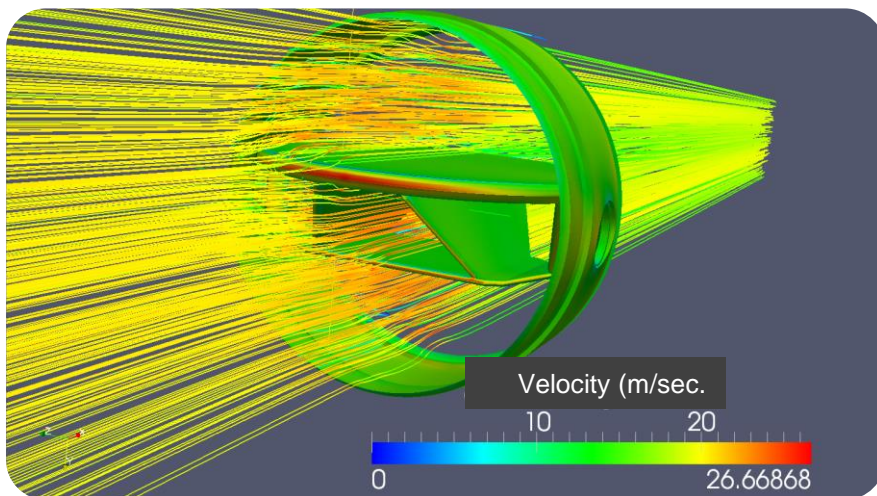

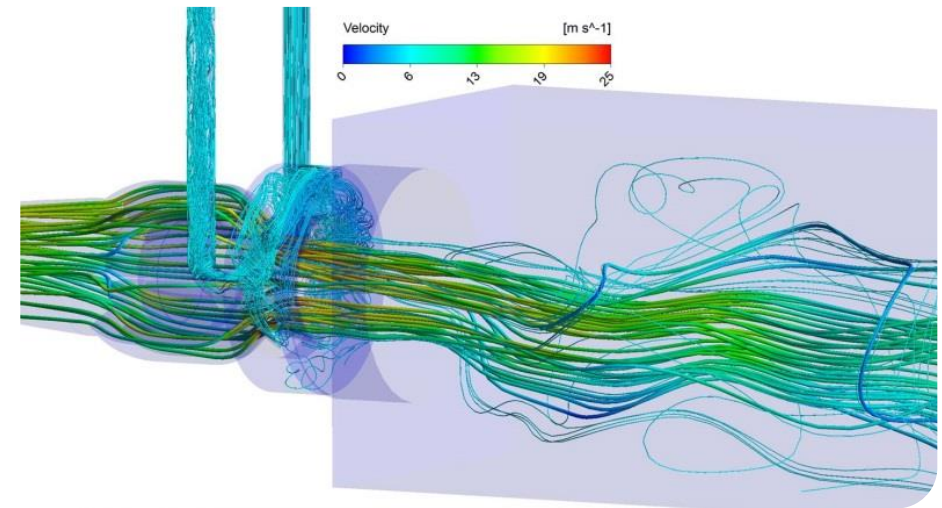

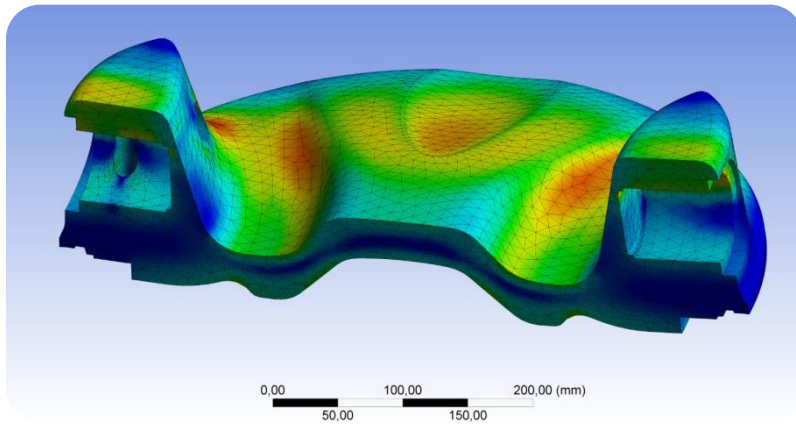

VAG offers all products and services from a single source - from the casting up to testing of the finished valve and we can additionally provide on-site installations.

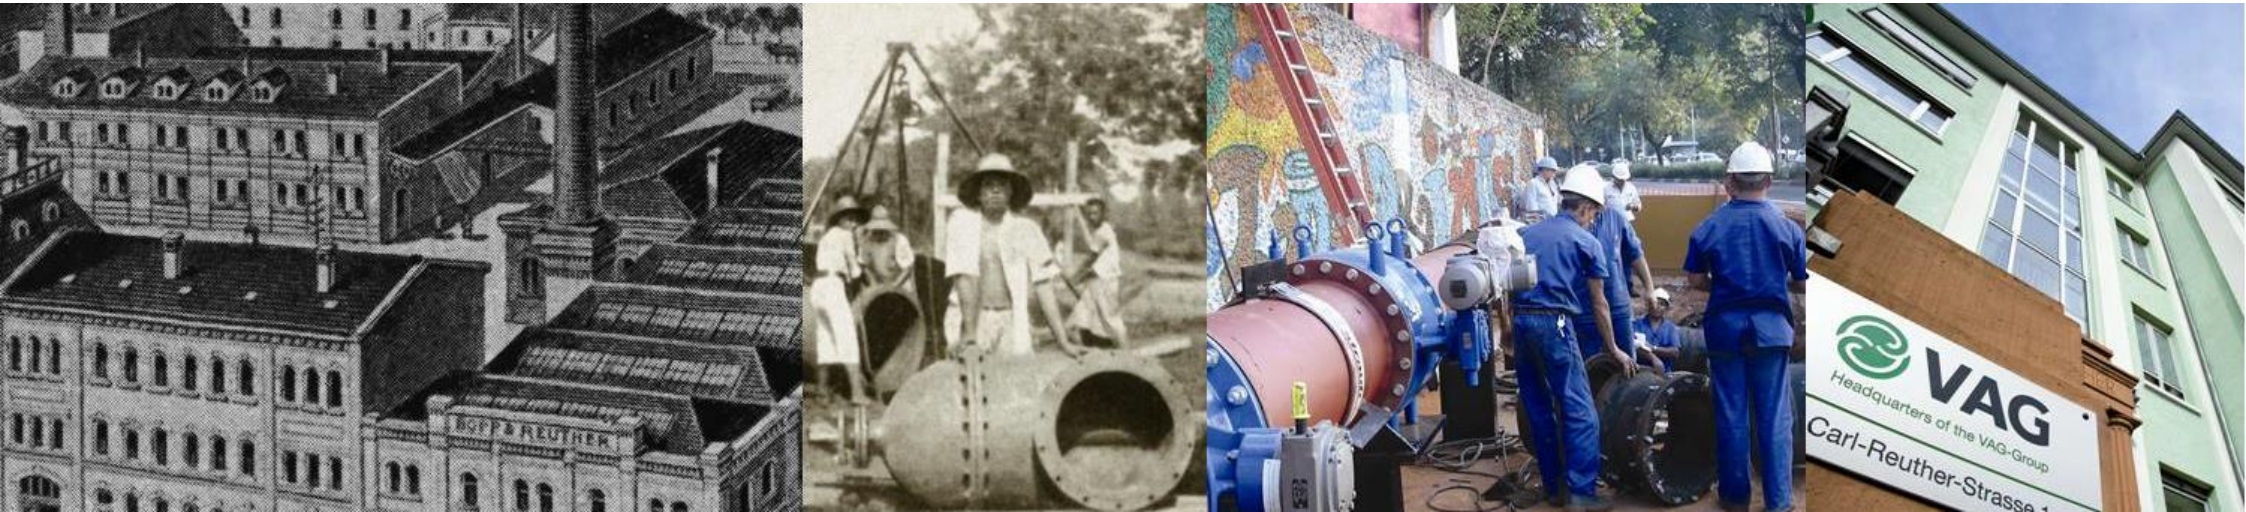

We offer professional consultancy to all our customers as well as technical support with a variety of useful tools. Our professionally qualified specialists will help you to find the best solution for your project, no matter where and how demanding it is.

3D Valve Design with FEM Analysis and CFD Simulations

We are using modern calculation methods for the design of our products.

Pioneers of the valve engineering & manufacturing

COMPANY HISTORY

VAG's History Started 1872

1872

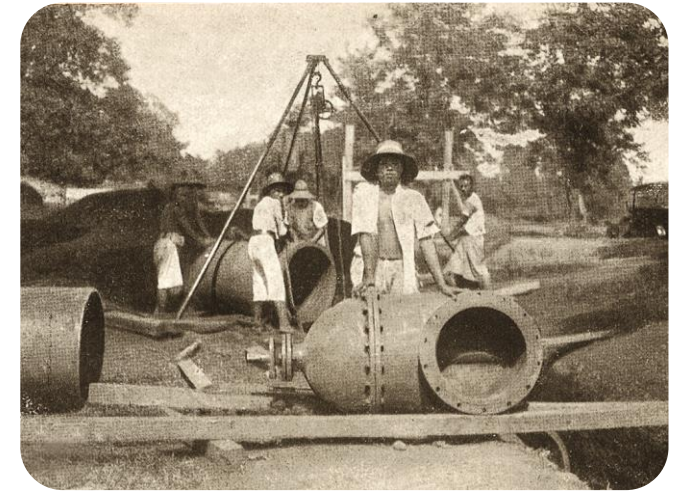

Carl Reuther and Carl Bopp founded Bopp & Reuther as a manufacturer of pumps and heavy valves.

1925

VAG-Armaturen GmbH was founded as a sales company of different valve manufacturing companies **Vereinigte Armaturen-Gesellschaft** (means Associated Valve Company).

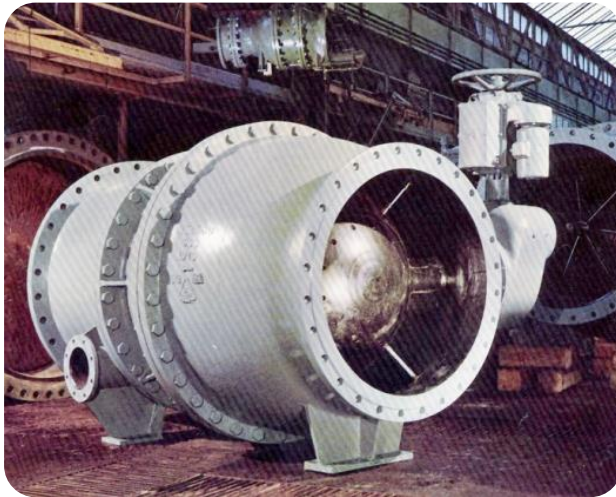

1930

In the year 1930, VAG became one of the leading suppliers in South America and had already over 60 Sales locations world wide in cities like London, Tokyo, Paris, Rio de Janeiro, Melbourne ...

Important Product Developments Since 1932

1932

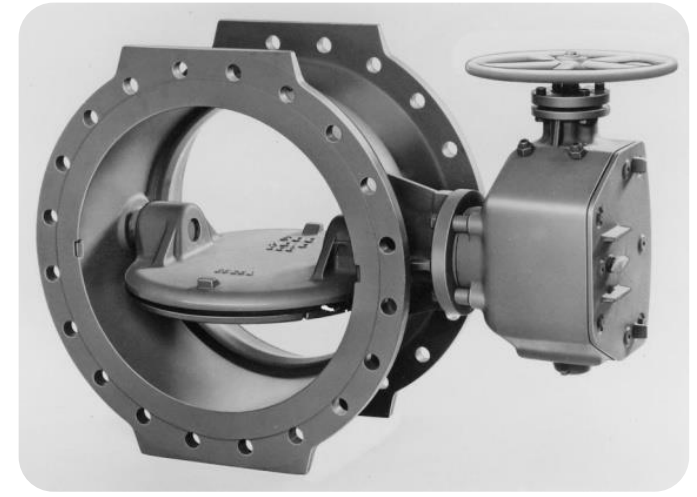

The first Needle Valves were engineered and produced. Today VAG is a leading company for control valves, our biggest size is 88" (DN 2200).

1968

One of the best-known products was launched into the market. The **BETA® 136** Gate Valve which was the first resilient seated gate valve with a completely rubber coated wedge.

1976

The Eccentric Butterfly Valve program **EKN** started and it was the beginning of an on-going success story. Today VAG is market leader for double-offset Butterfly Valves worldwide.

Since 27. November 2018 we have a new shareholder

2017

VAG manufactured 3 pcs. RIKO® Plunger Valves in dimension 88" (DN 2200) for a hydropower plant in Canada.
Successful commissioning in April 2018.

2018

AURELIUS Equity Opportunities SE & Co. KGaA takes over the VAG-Group. The AURELIUS Group is an investment group with business activities all over Europe and offices in Munich, London, Stockholm and Madrid.

Thank you very much for your attention!
