

About Hoeschen beratende ingenieure (H-BI)

As a two-in-one engineering consulting firm, H-BI offers end2end services with a focus on sustainable energy. H-BI executes infrastructure projects across all of Europe and capitalizes on the excess heat and water coming from industrial plants, rivers, lakes and geothermal sources. H-BI's heat recovery solutions present businesses with the tools to monetize their waste heat and water while reducing energy costs.

Services

H-BI is the one-stop shop for all heat and cooling recovery solutions. From data centers to steel factories to automotive assembly plants, H-BI engineers have helped a wide range of businesses monetize their waste heat. H-BI engineers have an extensive insight on technologies and implementation methods to maximize heat recovery in large industrial spaces.

Key Advantages of H-BI Services

- Plug-and-play energy solutions that yield energy-efficient, cost-saving end products
- Monetization strategies for waste heat originating from industrial, geothermal and other water sources
- Low production downtime for delivered systems
- Multidisciplinary expertise on numerous manufacturing fields for sustainable energy implementation

Partnership Opportunities

H-BI is eager to create heat recovery solutions with project developers, manufacturing plants and R&D firms in the metal, water supply and automotive industries.
