

FIT IN JAPAN!

Date: May 22nd, 2018

10:00 a.m. – 02:00 p.m.

Venue: German Chamber of Commerce in Japan

Company Presentation & Exhibition

Meet the FIT Experts!

Do Business with AM!

Enjoy!

Manufacturing industries are currently experiencing a **profound transformation** as new disruptive technologies emerge. This is due in the first line to additive manufacturing (AM) technologies which allow for totally new product solutions, e.g. related to light-weight construction, bionic design, new functionalities, etc. At the same time customers' demands are shifting worldwide from prototyping to mass production.

The German **FIT Group** is a pioneer and trendspotting contract manufacturer in the field of AM. Our expertise includes the whole process chain from pre-production engineering services and a vast multitude of AM technologies to a variety of refined post-production and quality measuring techniques. FIT runs the first manufacturing facility exclusively conceived for AM and has one of the world's largest capacities for metal AM. Our clients include major international corporations in the automotive industry, medical implant manufacturing, and special machinery.

The FIT Group is offering to share its expertise with companies who are seeking to revolutionize their product range by using professional additive manufacturing. Adopting the disruptive technologies on an industrial scale requires a new way of thinking as prior knowledge from conventional manufacturing will no longer be applicable. FIT can help companies avoid beginner's errors and give immediate access to game-changing new AM products.

To this goal, we would like to introduce FIT Japan K.K., the Japanese Office of the FIT Group, to interested corporations in Japan. FIT Japan's representative, Mr. Yasushi Murata, looks forward to outline the perspectives and chances of Additive Design and Manufacturing as provided by FIT.

Carl Fruth

Founder and CEO FIT Additive Manufacturing Group

Sponsoring: FIT ADDITIVE MANUFACTURING GROUP

Venue: German Chamber of Commerce and Industry in Japan
Sanban-cho KS building 5F, 2-4 Sanban-cho, Chiyoda-ku, Tokyo

Agenda – May 22nd, 2018

10:00 a.m. Welcome
Albert Klein, CFO FIT AG

10:05 a.m. German Experience in AM
Albert Klein, CFO FIT AG

Albert Klein graduated from St. Gall University with a MBA degree and joined United Technologies Carrier Corp. in 1989. In 1996, he joined the LTG Group as CEO. LTG Executive Chairman in 2003. Went into the solar industry in 2008, first as CEO of Ralos New Energies AG, then as CFO of solarhybrid AG. Joined FIT Group in April 2014 as CFO. Assumed responsibility as EVP Sales in April 2016.

11:00 a.m. Introduction to AM and FIT Group
Mr. Yasushi Murata
Senior Manager FIT Japan K.K.

Yasushi Murata graduated from University in Mechanical Engineering and has over 30 years of experience in the automotive sector. Originally specializing in conventional manufacturing technologies, Mr. Murata worked successfully for overseas mega suppliers in the past. Now his professional endeavors are fully in line with the enormous potential of additive manufacturing as conceived by the German technology leader FIT Group. Mr. Murata has been authorized as Senior Manager at FIT Japan K.K. who intend to introduce FIT's Additive Design and Manufacturing technology to the Japanese market.

12:00 a.m. Lunch & Networking
12 noon – 02:00 p.m.

02:00 p.m. End of the Event

Language: English / Japanese
Closing Date of Registration: May 15th, 2018
Registration: <https://goo.gl/m4p5Fg>
Entry Fee: Free
