

**Manufacturer of  
CNC Milling and Machining Centres**

**EiMa.**  
**The company.**

# Facts.

**40** 

## Years of experience

in the construction of the most complex machines for individual requirements.

**> 900**  
delivered  
machines / projects

approx. **65**  
**Employees**

With constant further training and a pronounced awareness of quality, we have earned an excellent reputation.

**4.000** m<sup>2</sup>

## Factory size

manufacturing, production, assembly and administration at the headquarters in Frickenhausen.

**6** **Contact points**

Subsidiaries and sales partners at home and abroad for optimal customer support.

**5** **Industries**

Aluminium machining, model & mould making, CFRP machining, plastics machining, etc.

**100%**

**EiMa-solution  
& system supplier**

**certificated**  
to ISO 9001  
to ISO 14001

**10** 

## Different series

CNC milling and machining centers, as well as special solutions.

# Industries.

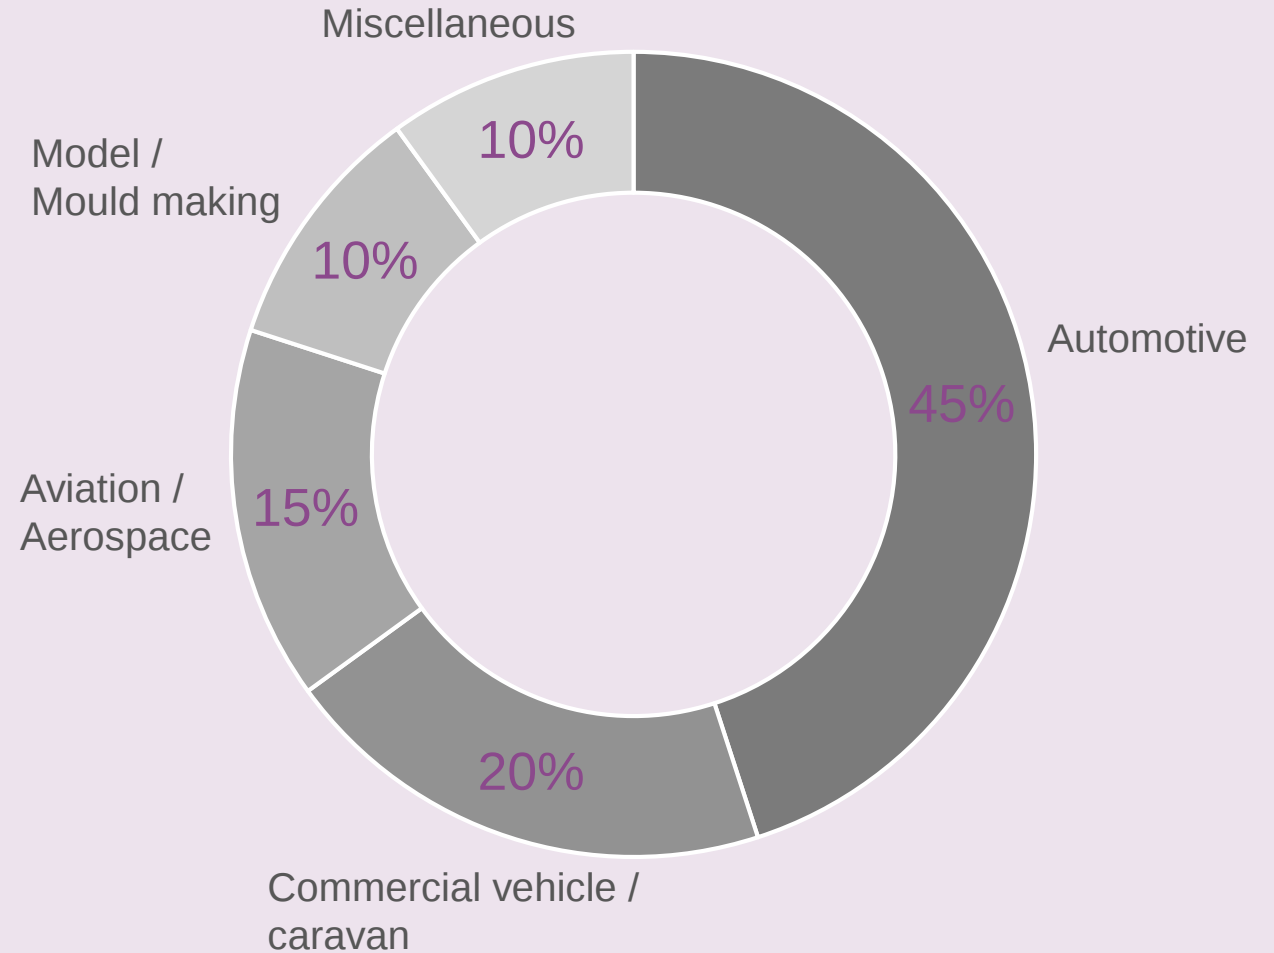

## Clientele:

- Automotive
- Commercial vehicle and Caravan
- Aviation and Aerospace
- Profile machining
- Model and Mould making

## Materials:

- Aluminium and Steel
- Plastics and Composites
- Wood materials
- Ceramics

Turnover by industry focus  
(averages)

The background of the slide is a photograph of a large industrial machine. A black, box-like head is suspended from above and is rotating, as evidenced by a blurred motion of a yellowish object at its tip. The machine is situated within a light-colored, industrial environment with various panels and structural elements visible.

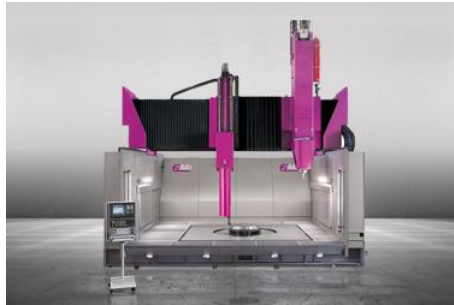

**Our drive.  
Our vision.**

# Our vision.

## ■ The idea.

A machine is sustainable when it proves its reliability and precision over many years in a resource-saving way!

## ■ The machine.

We want to meet the individual requirements of our customers with customised solutions.

## ■ The purpose.

Achieving a high level of customer satisfaction through the best advice and excellent service.

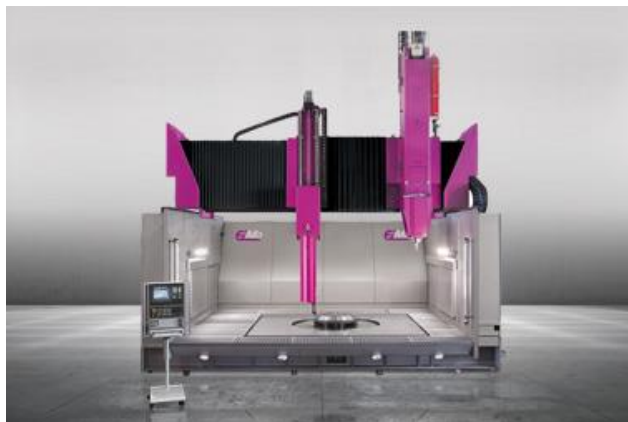

A close-up photograph of a precision industrial machine, likely a CNC lathe or mill. The image shows a large, curved metal component being processed, with several cylindrical tool holders and a sharp cutting tool visible. The background is a soft, out-of-focus industrial setting.

# Your Lightweight. Our solutions.

# Products and Services.

## ■ Products.

Vertical / horizontal machining center  
Universal machine  
Special purpose machine

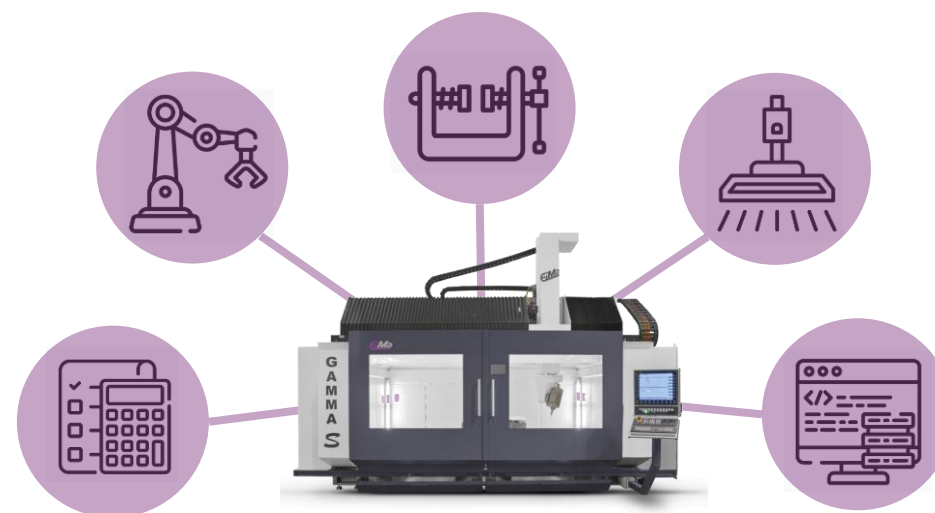

## ■ Services.

Training / Advice on machine use  
Maintenance / Geometry Check  
Remote services  
Retrofit

## ■ System supplier.

Machine  
Clamping device  
Automation (e.g. robot)  
NC program / G code  
Process time calculation  
Auxiliary units (e.g. extraction)  
Tools and equipment

# Machine series.
