

About the Company

Since Framence's establishment in 2019, it has been our mission to revolutionize the way technical installations, critical assets and buildings are documented and managed. The founders, a father and son, have a combined experience of 55 years in the architecture, engineering, and construction industry as well as in computer-aided design (CAD) and 3D modelling. We've been helping multinational organizations of all sizes across various industries such as chemical, pharmaceutical, logistics, oil & gas, and infrastructure to optimize their operations by using our digital twin platform. To cater to your needs regardless of where you may be based, we are building an extensive partner network to provide our services to you on a global level.

Products & Services

Transform your operations with Framence's intuitive digital twin platform! Our platform is the perfect solution for managing all aspects of your buildings, plants, and technical installations. From controlling light fixtures to regulating temperature, booking conference rooms and workspaces, to monitoring energy consumption and product output, our platform does it all. In addition, Framence also offers a cutting-edge 3D representation of reality, giving you a Street View-like experience of your facilities. Upgrade your operations with Framence's digital twin platform!

Their range of services / capabilities includes:

- Technological solutions: creation of photorealistic digital twins
- Platform for hosting digital twins: our advanced technology can handle any means of creation, from photos to point clouds and laser scans and much more
- Digital twins with a service: we take care of everything from taking the pictures necessary for the creation of your digital twins to creating, hosting, and updating them
- Project solutions: our team of experts offers custom solutions and operative implementation to ensure your success.

Key Advantages

- Decades of experience in digital twin technology, CAD, 3D modelling
- Product development, project management, or process optimization – through a holistic approach and by harnessing the company's entire range of competences, Framence ensures optimal value-added for its clients
- Extensive knowledge of the European digital twin industry, their players, trends, processes, and applied solutions
- Growing network of clients and partners worldwide
- Expert knowledge in the areas of digital twin technology, CAD, 3D modelling

Partnership Opportunities

Expand your business with Framence! We're looking for partners in the US who are industrial or engineering service providers, surveyors, engineering firms, Industry 4.0 solution providers or consulting firms with a focus on industrial applications and an end-to-end approach. Our solutions can add value to or extend your existing business model. You should also be able to market Framence in the US, take pictures for creating photorealistic digital twins, hold client workshops about our platform, and manage US accounts. Even if you don't think you fit the description, we'd still like to meet you and see if we're a good fit. Partner with Framence and take your business to the next level!
