

### Results of the

# BUSINESS SURVEY 2021

Situation and expectations of companies with German participation in the Baltic States in 2021

Since 2006, the German Chambers of Commerce, delegations and representative offices of German business in the region of Central and Eastern Europe (CEE) have been conducting a coordinated business survey - initially in 14, in 2021 in 16 countries.

The "AHK Business Survey CEE" primarily examines

- » the assessment of the economic situation and the economic outlook, as well as
- » the assessment of the quality of the location by the AHK members operating there. In recent years, however, investors from other countries have increasingly been included in the survey in several countries.

#### Note:

The sample size in the three Baltic states (EE, LT, LV) and Slovenia (SI) was significantly smaller than in other countries, so the results from these countries are subject to greater uncertainty and should be interpreted accordingly.

Results from 2020 are also marked with an \*, as the survey was not publicly analysed for representative reasons in the wake of the Covid-19 pandemic.

Statistical information can be found in the appendix

#### PART A: BUSINESS CLIMATE

RO	Romania	85
RS	Serbia	128
SI	Slovenia	32
SK	Slovakia	116
CEE	in total	1 454

### Statistical references

#### Average of the region / CEE

- "CEE region" refers to the 16 countries participating in the survey (see above).
- » Unless otherwise stated, "regional average" or "CEE average" means the arithmetic mean of the total results for the participating countries.
- » For some questions, the number of countries included in the CEE average is less than 16, unless the question in question was asked in all countries.
