

Thomas van Raamsdonk

Chief Executive of Pro Clima
New Zealand

Thomas van Raamsdonk is the Chief Executive of Pro Clima in New Zealand and Australia. He holds an engineering degree specialising in building physics and energy efficiency. Thomas gained extensive professional knowledge on airtightness, thermal bridging, healthy homes, Blower Door testing and Passive House. In 2011, he was one of a team of expert authors who published A New Zealand Based Study on Airtightness and Moisture Management.

Thomas is passionate about growing the building industry knowledge by sharing his experience. He is determined and dedicated to improving the building standards to ensure warm, dry, healthy, durable and energy-efficient living for everyone.
