

## **BITZER Kuehlmaschinenbau GmbH**

The BITZER Group is the world's largest independent manufacturer of refrigeration compressors and has been in business since 1934. BITZER is represented in over 90 countries with 64 locations and over 3,500 employees through distribution companies and production facilities for reciprocating, screw and scroll compressors, pressure vessels and heat exchangers.

In 2016 ElectraTherm was acquired by BITZER Group. ElectraTherm generates fuel-free, emission-free power from low temperature waste heat using the Organic Rankine Cycle (ORC) and patented technology. The company is the leader in small-scale waste heat recovery, with 730,000 hours of fleet runtime and 50 installed machines worldwide. ElectraTherm's waste heat to power generators are fully packaged with outputs up to 110kWe for distributed power generation on applications such as stationary engines, biomass, flare gas (at oil & gas wells, wastewater treatment plants, and landfills) and geothermal/co-produced fluids.

BITZER Group has already established export relations into Australia and New Zealand, however, the ElectraTherm Technology is not yet established in the New Zealand market. The business focus in New Zealand and Australia is to meet up with potential partners in the field of project development, system installation and energy solutions as well as getting in contact with companies operating in the field of 'on-site and off-grid energy', 'waste-heat-to-energy' and 'energy efficiency'. The objective is to get to know more about the current market situation around waste heat recovery systems and regulations in place.

Therefore, Mr. Rob Emrich, Director Global Sales and Marketing, would like to meet with

- manufacturers
- operators
- contractors
- project developers and
- investors

in the sectors of energy efficiency and renewable energy to discuss business opportunities.

Further product and company information is available at: [www.electratherm.com](http://www.electratherm.com)

**If you are interested in a meeting, please contact:**
